

From spreadsheets and paper to digital SOPs and 99%+ training compliance in just 90 days

Challenges in audits and a cross organisational aspiration to go paperless with training and compliance were the perfect backdrop for implementing Nvolve.

- ✓ All training reassigned and completed
- ✓ Lowest learning curve on Nvolve
- ✓ 99%+ Compliance achieved
- ✓ Full cross departmental engagement and buy-in
- ✓ Supported better performance in Audits
- ✓ On The Job training supported system engagement

We looked at a number of other platforms before Nvolve but the setup and learning curve were too demanding and would push us past the aggressive target we'd set in the business to have a functioning digital training system by end of our first financial quarter.

It was on this basis that we were recommended Nvolve by another Nvolve customer, with their full understanding of the task we'd set ourselves.

It was not easy but we were just small and agile enough to get data imported, sunset old paper records, re-allocate and confirm all training on ISO, safety and internal SOPs within the 3 month window.
